

## Designation Labeling Sheets

Category 6 and 5e rack-mount and mini patch panel ports and rear 110 connectors can be labeled using color-coded labels that can be either hand-labeled on-site or custom-printed using inkjet or laser printers. Templates can be downloaded from the Signamax web site, to help installers to lay out label sheets for custom printing. Front-panel labels are available in TIA/EIA 606 colors, and rear-panel labels are available in white. Labels can be pre-printed prior to installation, and applied to the panels at time of installation. Labels are supplied on 8.5" x 11" sheets suitable for printing using most inkjet and laser printers. Sequentially numbered port label strips are also available for numbering ports from 1 to 648.

### KEY FEATURES

- Front labels are color-coded per ANSI/TIA-606, total 6 colors
- Durable paper material compatible with most office inkjet and laser printers
- Adhesive material is compatible with patch panel labeling surface
- Standard 8.5 x 11-in (US Letter) size sheets
- Templates are available for downloading from the Signamax website

### ORDERING INFORMATION

#### Designation Labeling Sheets

Part Number	Description
